- F. Data box volume

#### Data Combi 2501

- A. 680 x 500 x 500mm
- B. 520 x 375 x 330mm
- C. 440mm
- D. 121kgs
- E. 64ltr
- F. 6.95ltr

#### Data Combi 2502

- A. 865 x 520 x 520mm
- B. 675 x 380 x 330mm
- C. 460mm
- D. 161kgs
- E. 84ltr
- F. 6.95ltr

#### Data Combi 2503

- A. 1100 x 650 x 560mm
- B. 880 x 475 x 350mm
- C. 570mm
- D. 267kgs
- E. 145ltr
- F. 12.9ltr

\*Data box reduces usable height by 200mm  
 \*\*Data box reduces usable height by 300mm

All weights and sizes are approximate.

All Phoenix Fire Safes come with a Free lifetime 'after the fire' replacement warranty and a full two year materials and labour warranty.

The Phoenix 2500 Data Combi series are manufactured from the best quality EGI steel plate and, when combined with the latest fire resistant technology, a safe of massive strength, security and innovation is produced.

Great attention was given in the design of the safe to create not only resistance to attack by force or fire, but also to simplicity and ease of use.

Every model 2500 meets and has been fire tested to the following Swedish SP Standards:-  
 3.5" Diskettes: NT FIRE 017-120 Diskette (120 minutes @ 1015°C)  
 Paper Records: NT FIRE 017-120 Paper (120 minutes @ 1045°C)

The user friendly electronic digital lock allows the user to programme their own personal code from up to 14 easily remembered numbers, with a master code override if required.

Whenever an emergency arises, simply close the door and the PAL automatic locking facility takes over.

Sliding steel bolts, 30mm in diameter, will immediately engage into the door frame, locking the door shut and prevent access by force. In addition, a unique combination of door curvature seals will also present a virtually airtight defence against penetration by heat, gases and the chemicals ever present in a fire.

Even greater strength and resistance can be obtained with an optional PAD 4, anchor system. This device permanently bolts the safe to any type of floor and prevents its physical removal from the premises. Use of this system not only deters attack, but also significantly increases the insurance rating of the safe.

Phoenix policy is one of constant improvement. We therefore reserve the right to alter any part of the specification achieved in this publication without incurring any obligation.
